# Mountain Weather Forecast

## Lake District National Park

Forecast valid from 00:00 on Monday 27 Jun 2022 until 23:59 on Tuesday 28 Jun 2022

Forecast Issued on Sunday 26 Jun 2022 at 10:14

**Confidence:** High confidence in the theme for an unsettled week for the Lake District, from Tuesday turning very showery and low confidence for the timing of showers. The signal for some heavy thundery showers is likely later on Wednesday.

**Headline for Monday 27 Jun 2022:** Overnight showers dying out and cloudy at first then a bright sunny day

| 60% | 60% | 60% | 30% | 10% | 10% | 10% | 10% |

**Forecast for Monday 27 Jun 2022**

**Weather:** Heavy showery rain is likely overnight, with the risk of some thunder and hail at times and gusty winds around showers. Showers beginning to die out by breakfast time but leaving some cloud and drizzle lingering for some time on Monday morning. Sunny spells developing and winds easing with a pleasant afternoon and evening expected.

**Chance of cloud-free hill tops above 800m:** 60% increasing to 95% by the afternoon, early low cloud associated with showery rain.

**Low cloud and visibility:** Periods of low cloud above 500m can be expected in the morning around showers. Cloud will lift and break as showers die out during the morning and nearly all the fell tops will be cloud free by early afternoon. Perhaps some patches lingering on the highest tops further west. Moderate visibility is likely as showers and drizzly rain clear the fells in the morning but by afternoon visibility will be very good or excellent.

**Level above which ground is expected to be frozen/snow is expected to settle.*

**Meteorologist's View**

Gusty around showers in the early morning and then windy again later in the day as a front begins to approach from the west.

**Forecast for Tuesday 28 Jun 2022**

**Weather:** A mainly dry night but increasing cloud from the west. Strong winds will push frontal rain east during the morning and it will be heavy at times around southwestern fells with the northeast areas likely to see some drier periods during the day. Rain will clear east during the evening with some clear spells developing later.

**Maximum wind:** Southerly 20mph with gusts 40mph, gusts increasing 45-50mph by evening.

**Chance of cloud-free hill tops above 800m:** 50%, low cloud in association with rain band will mostly be confined to fells in the southwest.

**Low cloud and visibility:** Scattered cloud layers above 500m will cover the fells at times as rain spreads across the area, in the north the low cloud will be more patchy and perhaps above 600m but in the southwest it may be more broken and lower at times. General visibility will be good at the start of the day but will fall moderate or poor in heavy rain at times especially in the south.

**Temperature:** **Valleys:** Plus 11 rising to 16 Celsius.
**At 800m:** Plus 6-9 Celsius.
**Freezing level:** Above all summits.
